Detailed Action

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
it is not signed or dated by applicant.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 3 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In each of claims 1, 3 and 5 the limitation "...said wick is adjustable in order to achieve maximum attraction of said at least one liquid attractant..." as seen in lines 6-7 of claim 1, lines 6-7 of claim 3 and lines 7-9 of claim 5, is indefinite in that as seen in applicant's disclosure the wick is to absorb the attractant so that the attractant can be emitted

Art Unit: 3643

from the device and the wick is not used to attract the liquid attractant but is instead to aid in attracting the insects to the device.

Claims 2 and 4 depend from rejected claims 1 or 3 and include the limitations of claims 1 or 3 thereby rendering these dependent claims indefinite.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 2,254,948 to Kubalek or U.S. Patent No. 4,908,977 to Foster.

Referring to claims 1-5, Kubalek and Foster disclose a device/method for providing uniform emission of a flying insect attractant comprising, a container – at 14,16 of Kubalek and – at 1-3 of Foster, comprising a composition having at least one liquid attractant for attracting flying insects – see for example page 1 column 2 lines 26-33 of Kubalek and column 2 lines 1-68 of Foster, a wick – at 11 of Kubalek and – at 4 of Foster, inserted into the container wherein the wick is adjustable in order to achieve maximum attraction of the at least one liquid attractant – see for example figures 1-5 of Kubalek and figures 1-2 of Foster, and an opening – at 19 or 20 of Kubalek and – at 5 of Foster, in the container to allow air to enter the device as the at least one liquid attractant is absorbed in the wick – see for example figures 1-5 of Kubalek and figures 1-2

Art Unit: 3643

of Foster, at least one volatile insecticide is in the container and is absorbed by the wick – see for example page 1 column 2 lines 22-25 of Kubalek and column 2 lines 1-68 of Foster, and hanging the at least one trap in a location suspected of being infested by at least one of a targeted pest flying insect – see for example – at 21 or 38 or 39 in figures 1-5 of Kubalek and claim 20 in column 8 of Foster.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
